EDUCATION

University of Maryland, College Park

Bachelor of Science in Computer Science, President's Scholar

Relevant coursework: Object-Oriented Programming, Advanced Data Structures & Algorithms, Introduction to Data Science, Computer Vision, Web Application Development, Organization of Programming Language

WORK EXPERIENCE

Cathexis — Sept. 2025 - Present

Systems Engineer — *Tysons Corner, VA*

• Served as Subject Matter Expert (SME) for QMetry, a quality assurance platform used by hundreds of internal U.S. Census Bureau employees, leading its migration to updated Linux distributions across all relevant servers to ensure continued availability and compliance.

Amazon Web Services (AWS) — May 2024 - Aug. 2024

Software Engineering Intern — *Arlington, VA*

• Worked on a service that pushes automatic user permission updates for supported AWS services. The service drastically reduced manual efforts by engineers, saving 100 hours per year of engineering time.

• Used TypeScript to configure AWS services, Kotlin to implement business logic, AWS Lambda and API Gateway for event-based triggers, and AWS CLI as the main API endpoint.

UnitedHealth Group — June 2023 - Aug. 2023

Software Engineering Intern — *Phoenix, AZ*

• Worked on a team to develop a full-stack project that visualized data from 10,000+ help desk/service tickets weekly for enterprise-level oversight, reducing managerial workload and saving managers 10 hours per week.

• Used **Vite** for front-end testing, **React** for component-based website architecture, **Python** (**Django**) and **PostgreSQL** for database management, and **Kubernetes** for deployment.

EXTRACURRICULAR ACTIVITIES / PROJECTS

Quantitative Analyst at Apex Quant — Sept. 2023 - Dec. 2024

Software Team — *College Park, MD*

• Developed and maintained trading infrastructure for UMD's Apex Quant club, automating execution of quantitative finance strategies and supporting data pipelines to grow the club's portfolio.

Task Organizer Project — Aug. 2023 - Nov. 2023

• Led a team to build a full-stack task management app with a dynamic frontend, real-time MongoDB storage, server-side EJS templating, and a REST API backend using Node.js and Express, deployed on Render.

SKILLS

Skilled in Python, Java [OOP], C, JavaScript (React, Node.js, Express), TypeScript, HTML, CSS, Ruby, OCaml, Rust, R, SQL, Kotlin, Linux/Unix, Git, AWS, Cloud Computing, UI/UX, Agile, Natural Language Processing, CI/CD, Web Scraping
