EDUCATION

University of Maryland, College Park

Bachelor of Science in Computer Science — *College Park, MD*

- Awarded merit-based President's Scholarship for exceptional academic achievement.
- Earned business, society, and the economy citation from College Park Scholars.
- Relevant coursework: Object-Oriented Programming, Advanced Data Structures & Algorithms, Introduction to Data Science, Computer Vision, Web Application Development, Organization of Programming Languages.

WORK EXPERIENCE

Amazon Web Services (AWS) — **May 2024 - Aug 2024**

Software Engineering Intern — *Arlington, VA*

- Developed a service that automatically updates user permissions for supported AWS services, reducing manual engineering efforts and saving *100* hours per year.
- Used **TypeScript** to configure AWS services, **Java/Kotlin** for implementing business logic, **AWS Lambda** and **API Gateway** for event-based triggers, **AWS CLI** as the main API endpoint, and **Smithy** to model endpoints.

UnitedHealth Group — **June 2023 – Aug 2023**

Software Engineering Intern — *Phoenix, AZ*

- Collaborated on a team to develop a full-stack application that visualized data from *10,000+* weekly help desk tickets, enabling enterprise-level oversight and reducing managerial workload by *10* hours per week.
- Utilized **Vite** for front-end testing, **React** for component-based architecture, **Django** with **PostgreSQL** for backend management, and deployed via **Kubernetes** using CI/CD pipelines through Git.

Army Research Laboratory — **June 2022 - Aug 2022**

Research Intern — *Baltimore, MD*

- Collaborated with fellow interns to address an engineering challenge: ensuring an autonomous drone's survival after a terminal velocity fall, followed by ground data collection.

EXTRACURRICULAR ACTIVITIES/PROJECTS

Quantitative Analyst at Apex Quant — **Sept 2023 - Current**

Software Team — *College Park, MD*

- Member of the software team at the University of Maryland's Apex Quant Club. The team builds infrastructure to streamline and automate trading strategies developed by the research and trading teams.
- These technology-driven tools help improve efficiency and boost the club's portfolio performance.

Spaces - A Habit Tracking App — **August 2023 - November 2023**

- The app lets users build and track habits across customizable spaces, providing visual feedback on consistency. Users check in daily, and the app rates habits (improvement or inconsistency) based on personalized thresholds.
- Built with **Flutter** and **Dart** for fast, cross-platform development, to be released on iOS, macOS, and iPadOS.

SKILLS

• Java	• JavaScript (React)	• TypeScript	• Python	• C
• HTML/CSS	• Ruby	• OCaml	• Rust	• Flutter and Dart
• SQL	• Kotlin	• DevOps	• Agile Methodology	• Kubernetes
• Linux/UNIX	• CI/CD (Git)	• AWS	• Node.js (Express)	• Next.js
